

# DMS

Im Gegensatz zum Beleg-Archiv ist das Dokumentenmanagement nicht explizit für die Verwaltung von Belegen ausgelegt. Ein Dokumenten-Management-System (DMS) dient generell der Verwaltung von elektronischen Dokumenten. Das DMS von Kontor.NET kann also jegliche Formate von Dokumenten verwalten, speichert aber auch automatisch alle Druck- und Kommunikationsvorgänge mit. Sie finden also neben den Belegen auch Ihre E-Mail Kommunikation im DMS.

Schnellübersicht über die Funktionen

- Anzeige und Suchen von Dokumenten
- Verwalten von Dokumentenattributen
- Dokumente importieren

Das Dokumentenmanagement ist ein Plug-In zu Kontor.NET, hat eine eigene Benutzeroberfläche und wird anders bedient als die normalen Programmmodule. Im oberen Bereich befindet sich unter dem Hauptmenü (Datei, Ansicht, Hilfe) einige Aktionsschaltflächen („Importieren“, ...) sowie rechts das Suchfeld. Die Darstellung der eigentlichen Dokumente ist zweigeteilt. Der linke Bereich dient der Navigation in den Dokumenten während rechts eine Auflistung der Dokumente dargestellt wird.

| Datei Ansicht Hilfe   |  |                |                     |                |              |                               |                          |             |                     |                               |                          |             |                     |                               |                     |             |                     |                               |                  |             |                     |                               |                 |             |                     |                               |                    |             |                     |                               |                           |             |                     |                               |                   |             |                     |                               |                |             |                     |                               |               |             |                     |                               |                          |             |                     |                               |                          |             |                     |                               |                |             |                     |                               |                         |             |                     |                               |                   |             |                     |                               |                          |             |                     |                               |                        |             |                     |                               |                         |             |                     |                               |                          |             |                     |                               |                            |             |                     |                               |                           |             |                     |                               |                    |             |                     |                               |                      |             |                     |                               |              |             |                     |                               |                    |             |                     |                               |              |             |                     |                               |                        |             |                     |                               |                           |             |                     |                               |                      |             |                     |                               |                           |             |                     |                               |                      |             |                     |                               |               |             |                     |                               |                             |             |                     |                               |                           |             |                     |                               |                   |             |                     |                               |                          |             |                     |                               |                    |             |                     |  |  |  |

## In den Dokumenten navigieren

Wenn Sie das Dokumentenmanagement öffnen werden Ihnen alle Dokumente ungefiltert und unsortiert angezeigt. Wenn Sie die Darstellung einschränken möchten um ein bestimmtes Dokument zu finden ist die einfachste Möglichkeit die Suche zu nutzen. Wenn Sie in das Suchfeld z. B. einen Kundennamen eingeben, werden Ihnen die Dokumente aller Kunden deren Namen den Suchbegriff enthält angezeigt. Sie können auch mehrere Begriffe gleichzeitig in das Suchfeld eingeben, also z. B. „Auftrag bicross“ oder die Suche auf ein bestimmtes Feld beschränken in dem Sie „Feldnamen:Suchbegriff“ also z. B. „Ersteller:cg“ eingeben.

Weiterhin haben Sie die Möglichkeit nach Dokument-Attributen direkt zu filtern und zu

gruppieren. Dies hat den Vorteil, dass Ihnen alle Dokumente mit dem ausgewählten Attribut angezeigt werden. Um ein Attribut auszuwählen klicken Sie bitte auf den „Pfeil“ oberhalb von „Alle Dokumente“. Es öffnet sich ein Kontextmenü aus dem Sie ein Attribut auswählen können, nach dem gefiltert werden soll.

Wenn Sie beispielsweise das Attribut „Kundennummer“ auswählen, werden Ihnen neue Unterordner entsprechend den archivierten Kundennummern bei „Alle Dokumente“ angezeigt.

# Dokumente importieren

Sie haben auch die Möglichkeit neue Dokumente in das Dokumentenmanagement zu importieren. Klicken Sie hierzu auf „Importieren“ oder „Importieren aus Zwischenablage“. Es öffnet sich ein Dialog in dem Sie die zu importierende Datei auswählen können. Klicken Sie eine Datei an und klicken Sie rechts unten auf „öffnen“. Die Datei wird nun dem Dokumentenmanagement hinzugefügt.
